“
InstaMed stands out as an operator of a single proprietary network that can handle both healthcare and payment transactions. Reinforcing this unique attribute is InstaMed's compliance to both PCI and EHNAC standards.

”

INSTAMED OVERVIEW

InstaMed offers all transactions in the healthcare payment revenue cycle to solve the challenges of rising patient bad debt. With InstaMed's healthcare and payment solutions, providers can verify a patient's insurance coverage in batch before an appointment or in real-time at the point of service. Providers can then estimate patient responsibility before a patient receives care and offer patients convenient payment options such as flexible payment plans. Once the claim is adjudicated, providers can immediately collect the patient payment in the form of payment cards, healthcare cards, cash and check. Providers can even send patients electronic bills and allow them to pay online. All transactions can be easily tracked and managed through our comprehensive reporting.

INDUSTRY LEADING SOLUTIONS

- Solicited claim status inquiries integrated into your system

Remittance

- Streamlining your workflow with automated posting
- Eliminate paper checks and EOBs to save time

INDUSTRY LEADING PRODUCTS

InstaMed Online for Providers

InstaMed Online simplifies the management of all your healthcare and payment transactions with our secure, cloud-based portal. No installation is required, and you can securely access InstaMed from any computer 24 hours a day, 365 days a year.

Patient Portal

70% of your patients pay their household bills online. InstaMed helps you leverage this trend by allowing your patients to view and pay their bills online through a simple, convenient, reliable and secure portal. InstaMed's Patient Portal is easy to set up, can include your brand and can even link to your existing website.

InstaMed Connect

Managing legacy integrations can be complex, time-consuming and ultimately cost prohibitive. InstaMed Connect, the healthcare industry's first fully integrated and open Application Programming Interface (API), offers a comprehensive answer by enabling any system to integrate with InstaMed's network.

INDUSTRY LEADER IN COMPLIANCE

- Certified as a PCI Level One Service Provider
- Accredited by EHNAC as a healthcare clearinghouse
